EMPLOYMENT HISTORY

Software Developer

Present

- Successfully delivered projects prioritizing strong client relationships by working closely to understand their needs and align solutions with their business goals.
- I architected and developed a complete e-commerce solution for a food service business, handling the entire development lifecycle from requirements analysis to deployment.

Key Project:

Sanguches E-commerce Platform (2024)

Full-cycle Development Project

- Implemented advanced product customization features using React Context API and custom hooks, improving user engagement by 40%
- Developed responsive UI with modern React patterns and optimized performance through lazy loading, code splitting, and efficient state management
- Built comprehensive e-commerce features including real-time shopping cart updates, and integrated payment processing via QR codes
- Successfully integrated WhatsApp Business API for automated order processing and customer notifications

Technologies Used:

Frontend: React, Material-UI, Tailwind CSS

State Management: Context API, Custom Hooks

- Integration: RESTful APIs, WhatsApp Business API

Data Analyst

Taurus Services | Jan 2023 - Present

- Successfully managed and processed large datasets, ensuring data integrity and accuracy for improved efficiency
- Developed web-based platform using React.js and Javascript enhancing interface design.
- Analyzed large data sets using database queries to maintain inventory.

EDUCATIONAL BACKGROUND

- **Bachelor of Science in Informatics Engineering**
Politecnico Colombiano Jaime Isaza Cadavid, Colombia | 2019 - 2024
- **Meta Front-End Developer Professional Certificate**
- **Meta JavaScript Programming Certification**
- **Meta HTML and CSS certification**
- **Google IT Support Professional Certificate**
